1. Mini Automatic Film Applicator

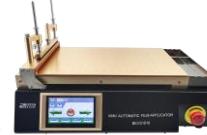

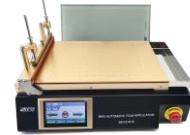

1) Introduction

The BEVS 1818 Mini Automatic Film Applicator is an ideal machine for preparing a wide variety of product samples including paint, varnish, cosmetics and glue on substrates. Its special structure ensures the application smooth without the ridges which happens during the film application.

2) Feature

- Touch screen, easy control
- With weights which added to ensure pressure
- Compatible with wide range of small film applicators
- With anti-dripping pan
- With clamp to ensure substrate fixed firmly
- Vacuum adjustable
- Special design to minimize vibration
- Beds changeable

4. Customized option

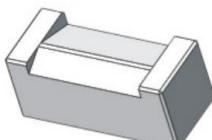

5. Manual film applicator

1) Single Sided Applicator

BEVS 1801

BEVS1808

Introduction

The applicator is made of high grade stainless steel and is easy to clean, both models can be used with automatic film applicator. Model 1808 has two different inlet slopes which makes the test samples range wider and the test results are more ideal.

Technical parameter

- High-grade stainless steel, wear-resistant
- Available in two film widths: 50 and 75 mm
- Available in six film thicknesses: 50, 75, 100, 125, 150, 200 μ m

Ordering information

Order model	Film width (mm)	Thickness (μ m)
BEVS 1801/50/50	50	50
BEVS 1801/50/75		75
BEVS 1801/50/100		100
BEVS 1801/50/125		125
BEVS 1801/50/150		150
BEVS 1801/50/200		200
BEVS 1801/75/50	75	50
BEVS 1801/75/75		75

BEVS 1801/75/100		100
BEVS 1801/75/125		125
BEVS 1801/75/150		150
BEVS 1801/75/200		200
BEVS 1808/50/1	50	50
BEVS 1808/75/1	75	100

- Different widths and gaps can be customized according to requirements

2) Two Sided Applicator

BEVS 1802

Product description

The applicator is made of high grade stainless steel, the C shaped design makes the sample gather to avoid leaking on the test panel. It can also be used on automatic film applicator.

Technical parameter

- High-grade stainless steel, wear-resistant
- C-shaped design is convenient for drawdown
- Overall length: 90mm

Ordering information

Order model	Film width (mm)	Thickness (μm)
BEVS 1802/1	80	25, 50
BEVS 1802/2	80	75, 100

BEVS 1802/3	80	150, 200
BEVS 1802/4	80	300, 400

■ Different widths and gaps can be customized according to requirements

3) Four Sided Applicator

BEVS 1803

BEVS 1807

Product description

The applicator is made of high grade stainless steel and is easy to clean. Four gaps in one applicator makes it more suitable for the lab.

Technical parameter

- High-grade stainless steel wear-resistant material
- Film width: 60 mm or 80 mm
- 4 kinds of gaps, just rotate 90 degrees to use another gap
- Dimensions: 120×15×25.5 mm

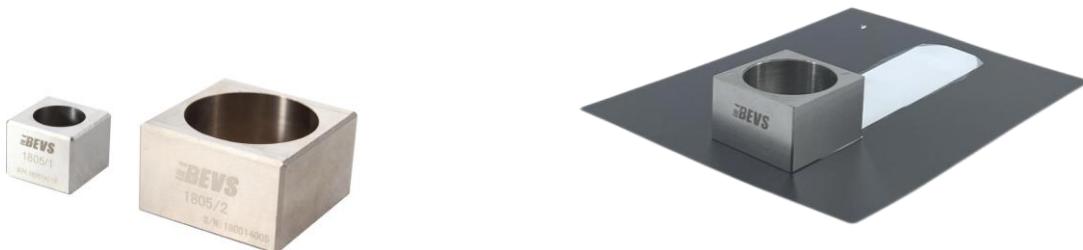

Ordering information

Order model	Film width (mm)	Thickness (μm)
BEVS 1803/60/1	60	30, 60, 90, 120

BEVS 1803/60/2	60	50, 100, 150, 200
BEVS 1803/60/3	60	100, 200, 300, 400
BEVS 1803/60/4	60	300, 400, 500, 600
BEVS 1803/60/5	60	5, 10, 15, 20
BEVS 1803/60/6	60	25, 50, 75, 100
BEVS 1803/80/1	80	30, 60, 90, 120
BEVS 1803/80/2	80	50, 100, 150, 200
BEVS 1803/80/3	80	100, 200, 300, 400
BEVS 1803/80/4	80	300, 400, 500, 600
BEVS 1803/80/5	80	5, 10, 15, 20
BEVS 1803/80/6	80	25, 50, 75, 100
BEVS 1807/80/1	80	30, 60, 90, 120

■ Different widths and gaps can be customized according to requirements

4) Cube Applicator

Product description

The item is made of high grade stainless steel with special design which makes the film with high repeatability and easily compare with different samples. It is especially suitable for drying time recorder and min. film forming temperature instrument sample preparation.

Technical parameter

- High-grade stainless steel wear-resistant material
- Each applicator is available in two thicknesses
- Especially suitable for sample preparation of drying time recorders

Ordering information

Order model	Film width (mm)	Thickness (μm)
BEVS 1805/1	16	37, 75
BEVS 1805/2	41	50, 100
BEVS 1805/3	16	50, 100

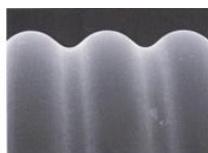

■ Different widths and gaps can be customized according to requirements

5) Bar Coater

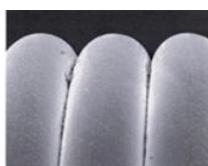

Introduction

BEVS bar coater adopts cold extrusion processing technology to process concave and convex wavy curves on the surface of the steel rod, so as to achieve better coating. It can reach the min. thickness of 4 μm .

The groove

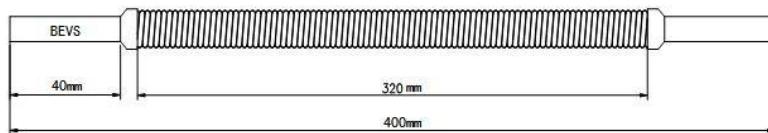

Other wire wrapped bar

Feature

- Not peel off
- Easy to clean
- Apply to 4μm

Specification

- High grade of stainless steel, Ø10mm
- Film Width: 200 Or 320mm
- Overall Length: 240 or 400mm

Order information

Order model	Film width (mm)	Thickness (μm)
BEVS 200/4...200	200	4, 6, 8, 10, 12, 15, 20, 25, 30, 40, 50, 60, 70, 80, 100, 120, 150, 200
BEVS 320/4...200	320	4, 6, 8, 10, 12, 15, 20, 25, 30, 40, 50, 60, 70, 80, 100, 120, 150, 200

Please specific the thickness while order.

Principle and use

If a very thin coating is required, it is recommended to use bar coater. The coating flows through the recesses between the wire rods, and then flows to produce thin coating.

Due to the volatilization of solvent, the dry film thickness of a coating is often less than its wet film thickness. Similarly, due to different physical characteristics, the wet film thickness is always smaller than the depth of the coating groove. The operator can learn an approximate coating thickness from the combination of specific coating, coating machine and coating method through practical experience. Knowledge of the coating composition enables the operator to know how to obtain the desired dry film thickness.

$$\text{Dry Film Thickness} = \frac{\text{Wet Film Thickness} \times \text{Solid content \%}}{100}$$

Groove Depth		Approx. Wet Film Thickness
mil	µm	
1-4	15-100	50% Groove Depth
5-12	101-300	60% Groove Depth
13-20	301-500	80% Groove Depth
>20	>500	90% Groove Depth

6) Adjustable Applicator

Model A With diversion baffle

Model B Without diversion baffle

Introduction

The adjustable applicator can make different thickness film by adjusting the two micrometers on top to lift up and down the scraper. The high-precision micrometer is in increments of 10µm.

Specification

- Made of stainless steel with high wear resistance
- Film Width: 50/100/150/200/250/300mm
- Accuracy: $\pm 2\mu\text{m}$
- Film Thickness Range: 0-3500 μm
- In 10 μm increments

BEVS 1806A With diversion baffle

- Diversion baffle make the operation more convenient.
- Smart magnetic design for quick cleaning after use.

7) Eight Sided Applicator

Introduction

The applicator is made of high grade stainless steel and is easy to clean. Eight gaps in one applicator makes it meet various demands.

Specification

- Made of high-grade stainless steel
- Film Width: 60mm
- Eight film thickness

Order Information

Model	Film Width (mm)	Thickness (μm)
BEVS 1817/1	60	25, 50, 75, 100, 125, 150, 175, 200

8) Four Sided Applicator With Reservoir

Order Information

Model	Film Width (mm)	Thickness (μm)
BEVS 1819/60/1	60	30, 60, 90, 120
BEVS 1819/60/2	60	50, 100, 150, 200
BEVS 1819/80/1	80	100, 200, 300, 400
BEVS 1819/80/2	80	300, 400, 500, 600

Customized is available upon request

9) Levelling Applicator

Introduction

The item is used to determine the flow of the paint in the 2D state when the wet film is placed in the horizontal state, so as to select an appropriate painting state by controlling the physical properties of the paint.

Specification

- ◆ Made of high-grade stainless steel
- ◆ 5 pairs of coating stripes with increased thickness

Order Information

Model	Name	Thickness Range μm
BEVS 1810/1	Levelling Applicator	100-200-300-500-1000
BEVS 1810/2	Levelling Applicator	250-500-1000-2000-4000

Customized is available upon request

10) Sagging Applicator

Introduction

Sagging Applicator is used for sagging resistance evaluation. Viscosity, fineness, thickness are major factors of sagging.

Specification

- ◆ Made of high-grade stainless steel
- ◆ 10 different films incremented by $25\mu\text{m}$
- ◆ Wet film width 6mm, spacing 1.5mm

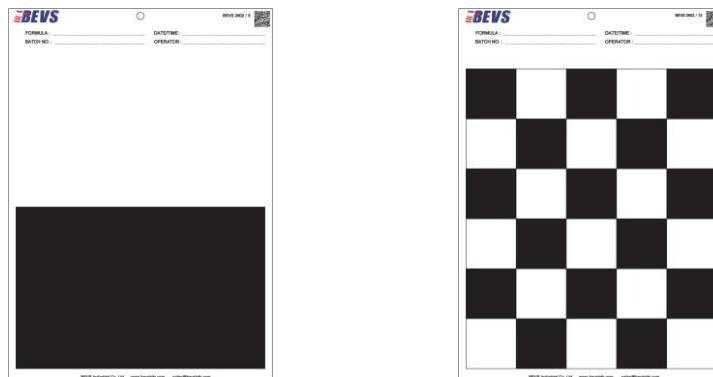

Order Information

Model	Thickness Range (μm)
BEVS 1809/1	50-75-100-125-150-175-200-225-250-275

Customized is available upon request

6. Test Substrate

1) Hiding Power Chart

BEVS 2902 Hiding Power Chart tests a variety of coating and ink properties, such as hiding power, coating rate, sagging, leveling, color and so on. It is widely used in building materials coatings, industrial coatings, automotive coatings, food, cosmetics and other related industries.

- Specification: 250x180mm
- Packing: 500 pcs/box
- Standards: ASTM D344, D2805

Order Information

BEVS 2902/05 Hiding Power Chart (Half white and half black)

BEVS 2902/13 Hiding Power Chart (Black and white chequer)

2) Black & White Panel

- Specification: 432x165x0.25mm
- Packing: 100 pcs/box

Black Panel BEVS 2805/P/004	White Panel BEVS 2805/P/012
	

7. Accessories

1) Weight added fixing unit

Applied model: BEVS 1811 series Automatic Film Applicator

Load bearing bracket	Weights
	
Qty: 200g*2, 100g*4, 50g*4	

2) Protective Cover

Specification

- Material: Acrylic
- Thickness: 5mm
- Dimension: 620×420×200mm
- Apply with 1811/1, 1811/2, 1811/3
- When the heating temperature of 1811 / 3 reaches 60 Celsius and above, the protective cover cannot be used
- Detachable, easy to transport, customer self-assembling

Order Information

BEVS 1811/P/010 Protective Cover
