

Wire Bar Applicators

Made of high-quality stainless steel, the wire bar applicators, also known as Mayer rods, drawdown bars or metering bars, allow the easy application of paints, varnishes, printing inks and adhesives, on a wide variety of substrates, such as paper or film, as well as flexible substrates, and will work well with motorised film applicators also.

We offer wet film thicknesses from 4 to 635 microns.

Total length 406 mm, layer width 305 cm, diameter 6 or 13 mm.

There is also a 305 x 305 mm application support for these bars.

Features

- Ideal for manual as well as automatic film application
- Wide range of film thicknesses available

Technical details

Material rod	Stainless steel 303
Material wire	Stainless steel 304
Diameter	1/4" or 1/2"
Total length	406 mm (16")
Film width	305 mm (12")
Film thickness	4 - 635 microns

Standards

ASTM D4147
