

High Speed Release Tester

Our High Speed Release Tester can perform peel tests to determine the release force at high speed on pressure sensitive adhesive materials according to the international standards like FINAT FTM4 and TLMI L-1A3

It comes with a data collection, processing and analysis software package. Due to its high data sampling rate of 500 measurements per second, the testcurve gives you very detailed information.

Features

- Test speed up to 300 m/min
- Powerful software, high sampling rate

Technical details

Loadcell	50 N
Speed	10 - 300 m/min $\pm 0.5\%$
Sampling	500 sec ⁻¹
Stroke	100 mm effective
Mains	220 V / 50 Hz, 400 W
Compressed air required	
Weight	35 kgs

Standards

FINAT FTM 4 • TLMI L-1A3
